What were the strengths of this course and/or instructor?

Comments
Cover a lot of valuable informations
I like that Prof Dolar loves teaching this material and she is willing to go over the material most of the time. I like that she brings relevant examples to explain the material.
passionate about what she teaches
Professor Dolar is highly energetic and grateful for questions.
When teaching actual equations and why they are important, she did a very good job explaining it and making sure everyone understood. She also clearly loves the topic she is teaching and truly engaged the class. The discussions in class were enlightening.
Strengths of this course and or instructor included prepared material, detailed information, ability to be flexible with students and fair grader.
Prof Dolar is very informative, I have a better understanding of my major.she explained how the health eco work? why is operates in the US and abroad. Overall, I learned so much about healthcare and excel and other topics in Health Economy.
The professor is very knowledgable and passionate about teaching this class. She's very open to feedback from the class to make sure everyone has a fair chance of being successful.
She is a very positive and interesting instructor. The material was very intriguing.
The course was really helpful, and interesting , I really like how healthcare economists is amazing and related, instructors have really good knowledge about it .
The strengths of this course were that the work was presented online, this was a convenient technological feature of the class.
Availability of all resources for free no book purchase necessary
learned more about excel
Teacher is good and made info interesting
I've learned a lot about health care economic system in the US and abroad, Market failures, excel software etc
I LOVE PROFESSOR DOLAR. Professor Dolar is such a great teacher! She has such a great personality and it is so apparent that she loves the subject she teaches. This class did some work with another Health Economics class in Slovenia, which was interesting. That was a completely new experience and I will remember it. She had us do a ton of our own research as part of this international project. I have never learned so much on my very own before. Although she had the students do all of the work ourselves, she gave us enough resources to do so. This class has really been a learning experience for research and I have been researching things on my very own now. I will gladly take any of her classes, whether I need them or not.

What were the weaknesses of this course and/or instructor?

Comments
The class has a lot of assignment
I think because this was a new course COIL, she didn't realize how much work she was giving us and most people didn't understand more than half of the work. It was really difficult and instead of teaching us where to find info or what to look for she said search the internet. That's difficult when you have never taken an economics course and you don't know what the heck you're doing!
provided a lot of work, although was manageable, deadlines were a bit off
She is a very ambitious teacher as she wants to go over and teach a lot. Unfortunately, this leads to an overload of work and disorganization.
Too much assignments.
The professor wasn't always clear and direct about the expectations for assignments. She would clear up any confusion after the fact
There was no organization. The way she wanted her work done was unknown until the assignments were already graded. The deadlines were not planned out beforehand.
The weakness was only it's sometime too much work , and very less time to submit, instructor has no weaknesses, she is smart and knowledgeable,
Although the work was very dense, the explanation and clarity of the objective was often not provided.
Too much all students had too many paper plus coil papers at same time
COIL canvas part of this class should only be used unless there are students from Slovenia who are going to stay enrolled in the course
Deadlines constantly changed which was confusing
NA,
Group projects are always though no matter what the subject is. So I cannot blame professor Dolar. I suspect that many people from this class will complain about there being way too much work, but that is not accurate. There were lots of assignments, but as I stated above, she gave us everything we needed to complete them easily. No weaknesses for Professor Dolar.

I enjoyed this course and Prof. Dolar's point of view.
I would take this professor again because she is very knowledgable and has an engaging method of teaching
Coil assignment and class was difficult,
Class needs less work . This class has more work than others 3 classes that I'm taking combined
I had no partner to work with so I had to do twice as much work
I would take her again,I want to know more about economics, overall she is a good teacher very knowledgeable.
